^{IT} SEEDS indaga il concetto di variabilità attraverso la costruzione di blocchi di materia tagliata che singolarmente appaiono disomogenei, ma che nel montaggio acquisiscono il loro equilibrio attraverso una diversificazione equilibrata delle intrusioni superficiali. In SEEDS la ricerca dei dettagli e degli equilibri fra pieno e vuoto fa di un materiale dall'aspetto primitivo, una superficie elegante e senza tempo.

^{EN} SEEDS explores the variability creating uneven blocks of material that acquires an equilibrium, in the installation, through a balanced diversification of the seeds on the surface. In SEEDS the research on details and on balances makes a raw material an elegant and timeless surface.

Una materia granulosa ma compatta in cui piccole intrusioni non vengono distribuite in maniera omogenea, ma sparse come semi sul terreno in modo casuale. Otto diverse lastre si mescolano casualmente per dare vita a un pavimento dal movimento discreto e naturale.

A granular but compact material in which small intrusions are not distributed homogeneously, but scattered like seeds on the ground in a random manner. Eight different slabs are mixed randomly to create flooring with a subtle and natural movement.
